

# NextDoor Farm

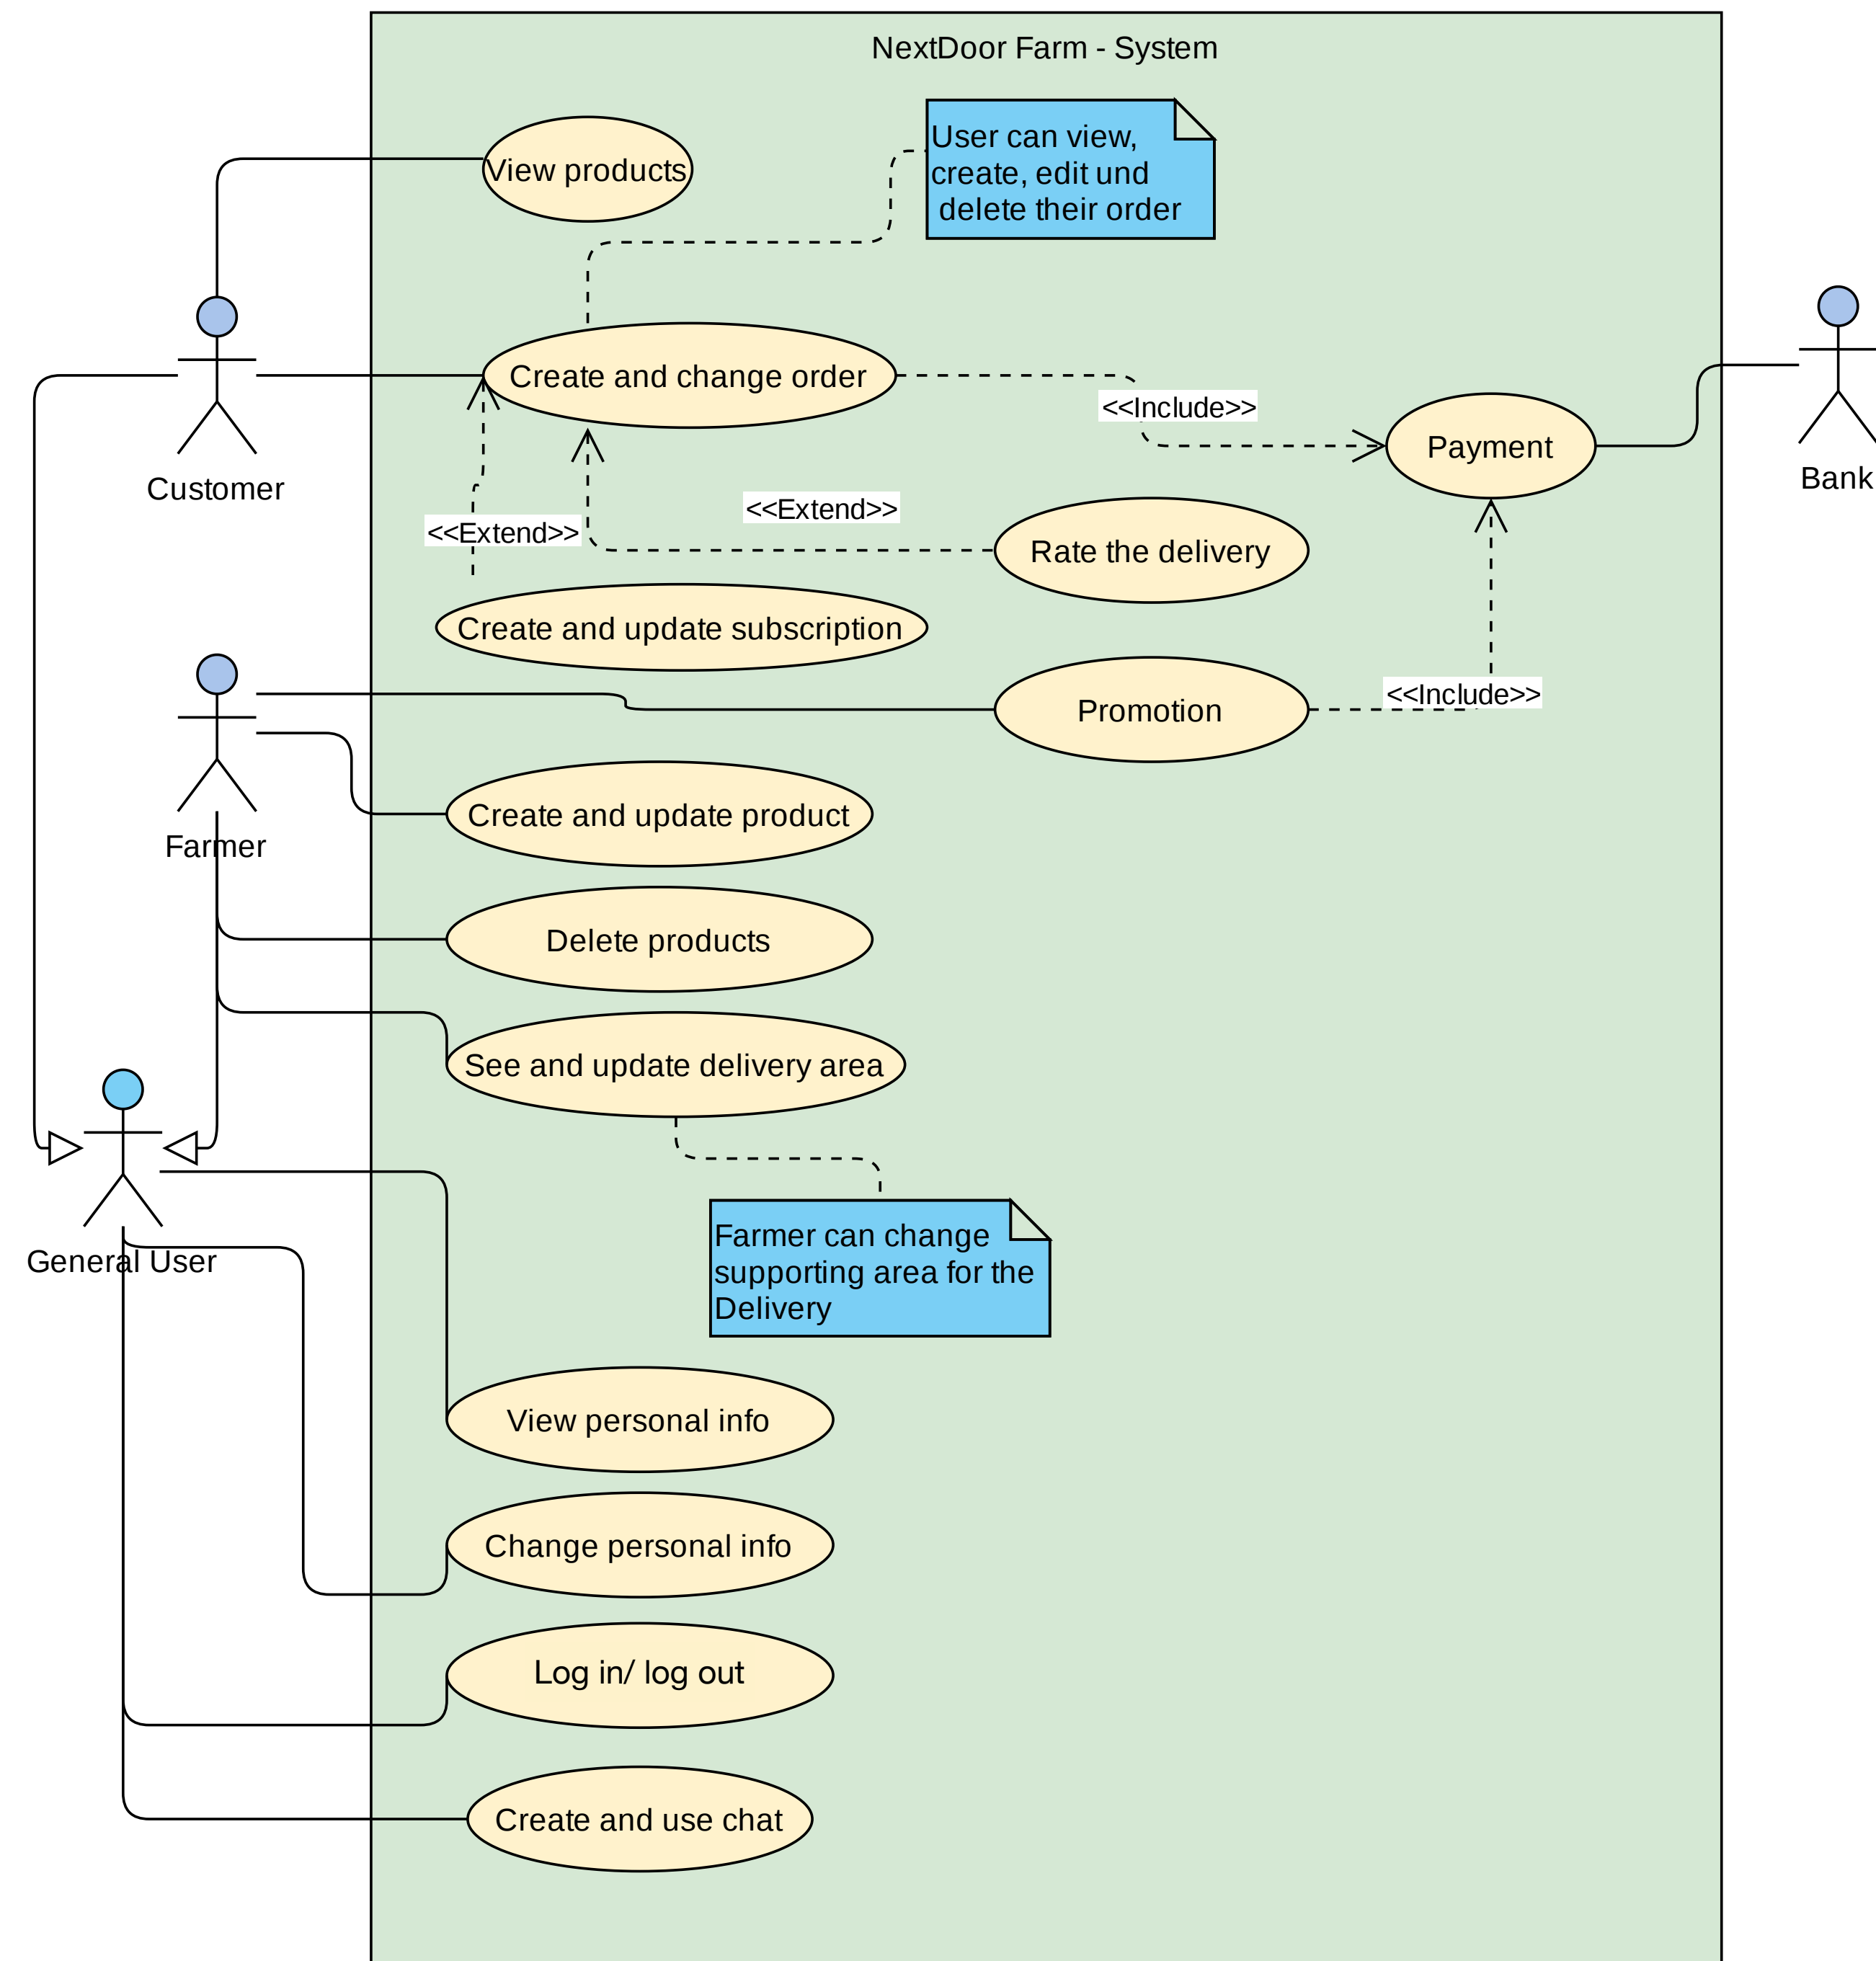

## Task 5

5/10/2021

# Product description

- The purpose of the application is to make eco-products available to wide range of people. It connects farmers with end-users. The application may ease the process of distributing the goods from local farms. This project is useful for the end-users as well as to the agriculturists. Above all, we hope to provide a comfortable user experience along with the best pricing available.
- Team: Darya Rednikina, Vadim Zhdanov, Semyon Savelev, Liana Batalova
